

F1 FIRST FILL

THE FIRST CHOICE

ABOUT US

Our mission is simple: to share our knowledge worldwide, reduce the consumption of lubricants, and still achieve the best lubricating on vehicles and machines to keep the world moving. We achieve this by producing original, top-quality products that are suitable for every machine and engine, while also using recycled materials for most of our packaging to reduce oil consumption.

At FIRST FILL, we believe that our commitment to sustainability can make a significant impact on the environment while still providing the best lubricating solutions. That's why we offer a complementary range of additives and maintenance lubricants, all formulated with people and environmentally friendly solutions or raw materials.

But that's not all – we also have a sporty side. Each product we produce exudes quality and comes with a well-balanced package of additives that allows it to perform in all markets and on all machines.

FIRST FILL's dedication to excellence has paid off, and many of our lubricant products are officially approved by reputable OEMs like VAG, Mercedes-Benz, BMW, MAN, and VOLVO. As our reputation grew, so did our business.

Official distributors around the world were eager to join the FIRST FILL family. If you're looking for a lubricant brand that is committed to sustainability, quality, and sportiness, look no further than FIRST FILL. Our products are trusted by customers around the world, and we continue to lead the industry with our innovative solutions.

Join the FIRST FILL family today and experience the difference for yourself.

... GOOD TO KNOW

Because of our **collaborations** with leading parties and **our own production facilities**, we can fully supply you with the products you want, in various packaging forms. Do not hesitate to contact us if you are looking for a specific product and/or alternative.

PURE PRODUCT, POWERED BY PURE AIR.

The traditional spray can, who doesn't know it? The pressure in this aerosol is achieved by a propellant gas in combination with harmful solvents, which are released together with the product during use. This may cause that an environmentally friendly formula will become harmful. This is why we introduce the Airopack®.

An alternative that is much better for the environment. Propelled by air instead of environmentally harmful propellants and solvents. Transparent, practically unbreakable and 360 rotatable without any pressure loss. Non-flammable and non-explosive. In addition, no health risk by inhalation. An innovative and sustainable solution to replace the conventional aerosol.

// POWERED BY 100% AIR

Airopack® is powered by air. Completely free of harmful propellants.

// ENVIRONMENTALLY FRIENDLY

Works on the basis of pure air, which results in a 32% lower CO₂ footprint.

// 360° USABLE

Use it in all directions, where and when you need it most.

VERSATILE

Due to the different configurations, the Airopack® is suitable for many formulations such as greases, assembly pastes, cleaning agents, impregnating agents and more.

32% LOWER CO₂ FOOTPRINT

AIROPACK FORMULATIONS

INDUSTRIAL

- // Ceramic Paste
- // Copper Paste
- // Aluminium Paste
- // Universal Grease
- // Multi-Functional EP Grease
- // Multi Oil
- // Penetrating Oil
- // Food Grease (NSF)
- // Food Cleaner (NSF)
- // Food Assembly Paste (NSF)

BIKE CARE *ECO*

- // Bearing Grease
- // Assembly Paste
- // Chain Oil
- // Chain Wax
- // Universal Grease
- // Boron Grease
- // Multi Spray
- // Soft Cleaner
- // Power Cleaner
- // Contact Spray

CAR CARE *ECO*

- // Interior Cleaner
- // Fabric Cleaner
- // Fabric Protect
- // Glass Cleaner
- // Rim Cleaner
- // Quick Shine
- // Cockpit Spray
- // Tyre Milk
- // Luxury Car Scents
- // Bumper Restorer

... GOOD TO KNOW

The above formulations have been carefully designed in conjunction with the Airopack packaging. However, this is only a selection of the total range. Because of our **collaborations** with leading parties and **our own production facilities**, we can fully supply you with the products you want, in various packaging forms. Do not hesitate to contact us if you are looking for a specific product and/or alternative.
