

CHAIN LUBRICANT is a natural all-round lubricant that ensures that the bicycle chain keeps running smoothly all year round. This chain oil is suitable for all weather types. Due to the high VI-index, this oil is less sensitive to temperature fluctuations than traditional mineral oils.

This gives this product a stable lubricating effect at both higher and lower temperatures. The chain oil lubricates the links of the chain and ensures a lower friction between the different links and parts. This allows you to switch more smoothly and save on wattages.

APPLICATION

Suitable for the bicycle chain. The unique formula easily penetrates between the links and from here protects the chain against rusting, squeaking and cracking. Extremely suitable for wet weather conditions.

PROPERTIES

- High viscosity index
- Wide temperature range
- Suitable for all weather types
- Protects against corrosion
- Prevents squeaking and cracking

INSTRUCTIONS

Degrease the chain before using the Chain Lubricant. Apply the Chain Lubricant, a drop between each link is sufficient. Let this soak for a while and then wipe off the excess product with a dry cloth.

PHYSICAL PROPERTIES

Color	:	Yellow
Components	:	Vegetable oil, additives
Density	:	± 0,97 kg/l
Thermal	:	-15°C - +150°C

PACKAGING OPTIONS

- 200 ml Airopack® spray + straw
- 5 / 10 / 25 litre can
- 200 litre drum
- 1.000 litre IBC
