

PRODUCT DATA SHEET | PETROL ADDITIVE
OCTANE INCREASER

FIRST FILL OCTANE INCREASER is a high-quality gasoline additive that increases the octane number by 2 to 5 points. Octane Increaser increases the anti-knock resistance of petrol, prevents engine knocking and does not contain lead or other heavy metals. When using Octane Increaser, the engine will respond faster to the accelerator pedal. The engine feels more lively and at a constant speed the fuel consumption will decrease slightly.

Octane Increaser prevents and resolves knocking when the engine is operating high in its rev range. By adding this product to the gasoline, the resistance to knocking at high speeds will be significantly improved.

PROPERTIES

- Increases the octane value
- Increases the anti-knock resistance of the fuel
- Prevents engine knocking
- Free of lead or other metals
- Increases combustion
- Decreases fuel consumption on the longer term

APPLICATION

Suitable for all vehicles on petrol. A dosage of 250 ml to 50 liters gives the best result. This product is sufficient for 1 tank capacity and is only suitable for petrol engines.

PHYSICAL PROPERTIES

Density at 20°C, kg/l	:	0.98
Colour	:	Colorless
Components	:	Solvents Additives

PACKAGING OPTIONS

- 12 X 250 ML
- 5 / 10 / 25 LTR CANS
- 1000 LTR IBC
